

Tyne North Training Apprenticeships

Please ask your students to follow our social media pages. The links are below, we are very active on social media and post a lot of content for new and upcoming jobs!

<https://www.facebook.com/tynenorthtraining>

<https://www.instagram.com/tynenorthtraining/>

In regards to what apprenticeships we offer please see below.

- Level 3 business admin; 18 month duration
- Level 2 customer service; 12 months
- Level 3 engineering qualifications; 42 months, the engineering disciplines we provide are fabrication, welding, machining, maintenance and technical support.

All three apprenticeships would be suited to school or sixth form leavers, we work with a large variety of employers based throughout the North East particularly Gateshead.

The format for applying for both apprenticeships would be via our website

– www.tynenorthtraining.co.uk/apply, the student should select the apprenticeship option they are interested in, all applications are open. If the candidates initial application is successful they will be invited for a remote interview and asked to complete a written task. The tasks differ slightly between depending on if you are applying for business admin/customer service or engineering.

We haven't yet started interviewing for engineering this should start in next couple of months, we currently interview every Tuesday and Thursday for business admin/customer services. If candidates are successful we will store their details on a database in aim of finding them an apprenticeship for a summer start (September for engineering).

We will be sending further communication out in the coming weeks, so students can have more information about us and what we can offer.
